

CASE STUDY

QUICK-FIRE® 90 Sacrifice Layer

EQUIPMENT

10 MT Aluminum Barrel Furnace

PRODUCT

QUICK-FIRE® 90

APPLICATION

2 MT of QUICK-FIRE® 90 installed as a sacrifice layer on both sidewalls to renew thickness on the worn out belly band.

INSTALLATION

After mixing for 1 minute, material was poured and vibrated using a pencil vibrator.

RESULTS

Contractor cleaned the furnace and installed a new layer allowing the furnace to perform without any problems for over 2 years.
